

South Barnat Quick Facts

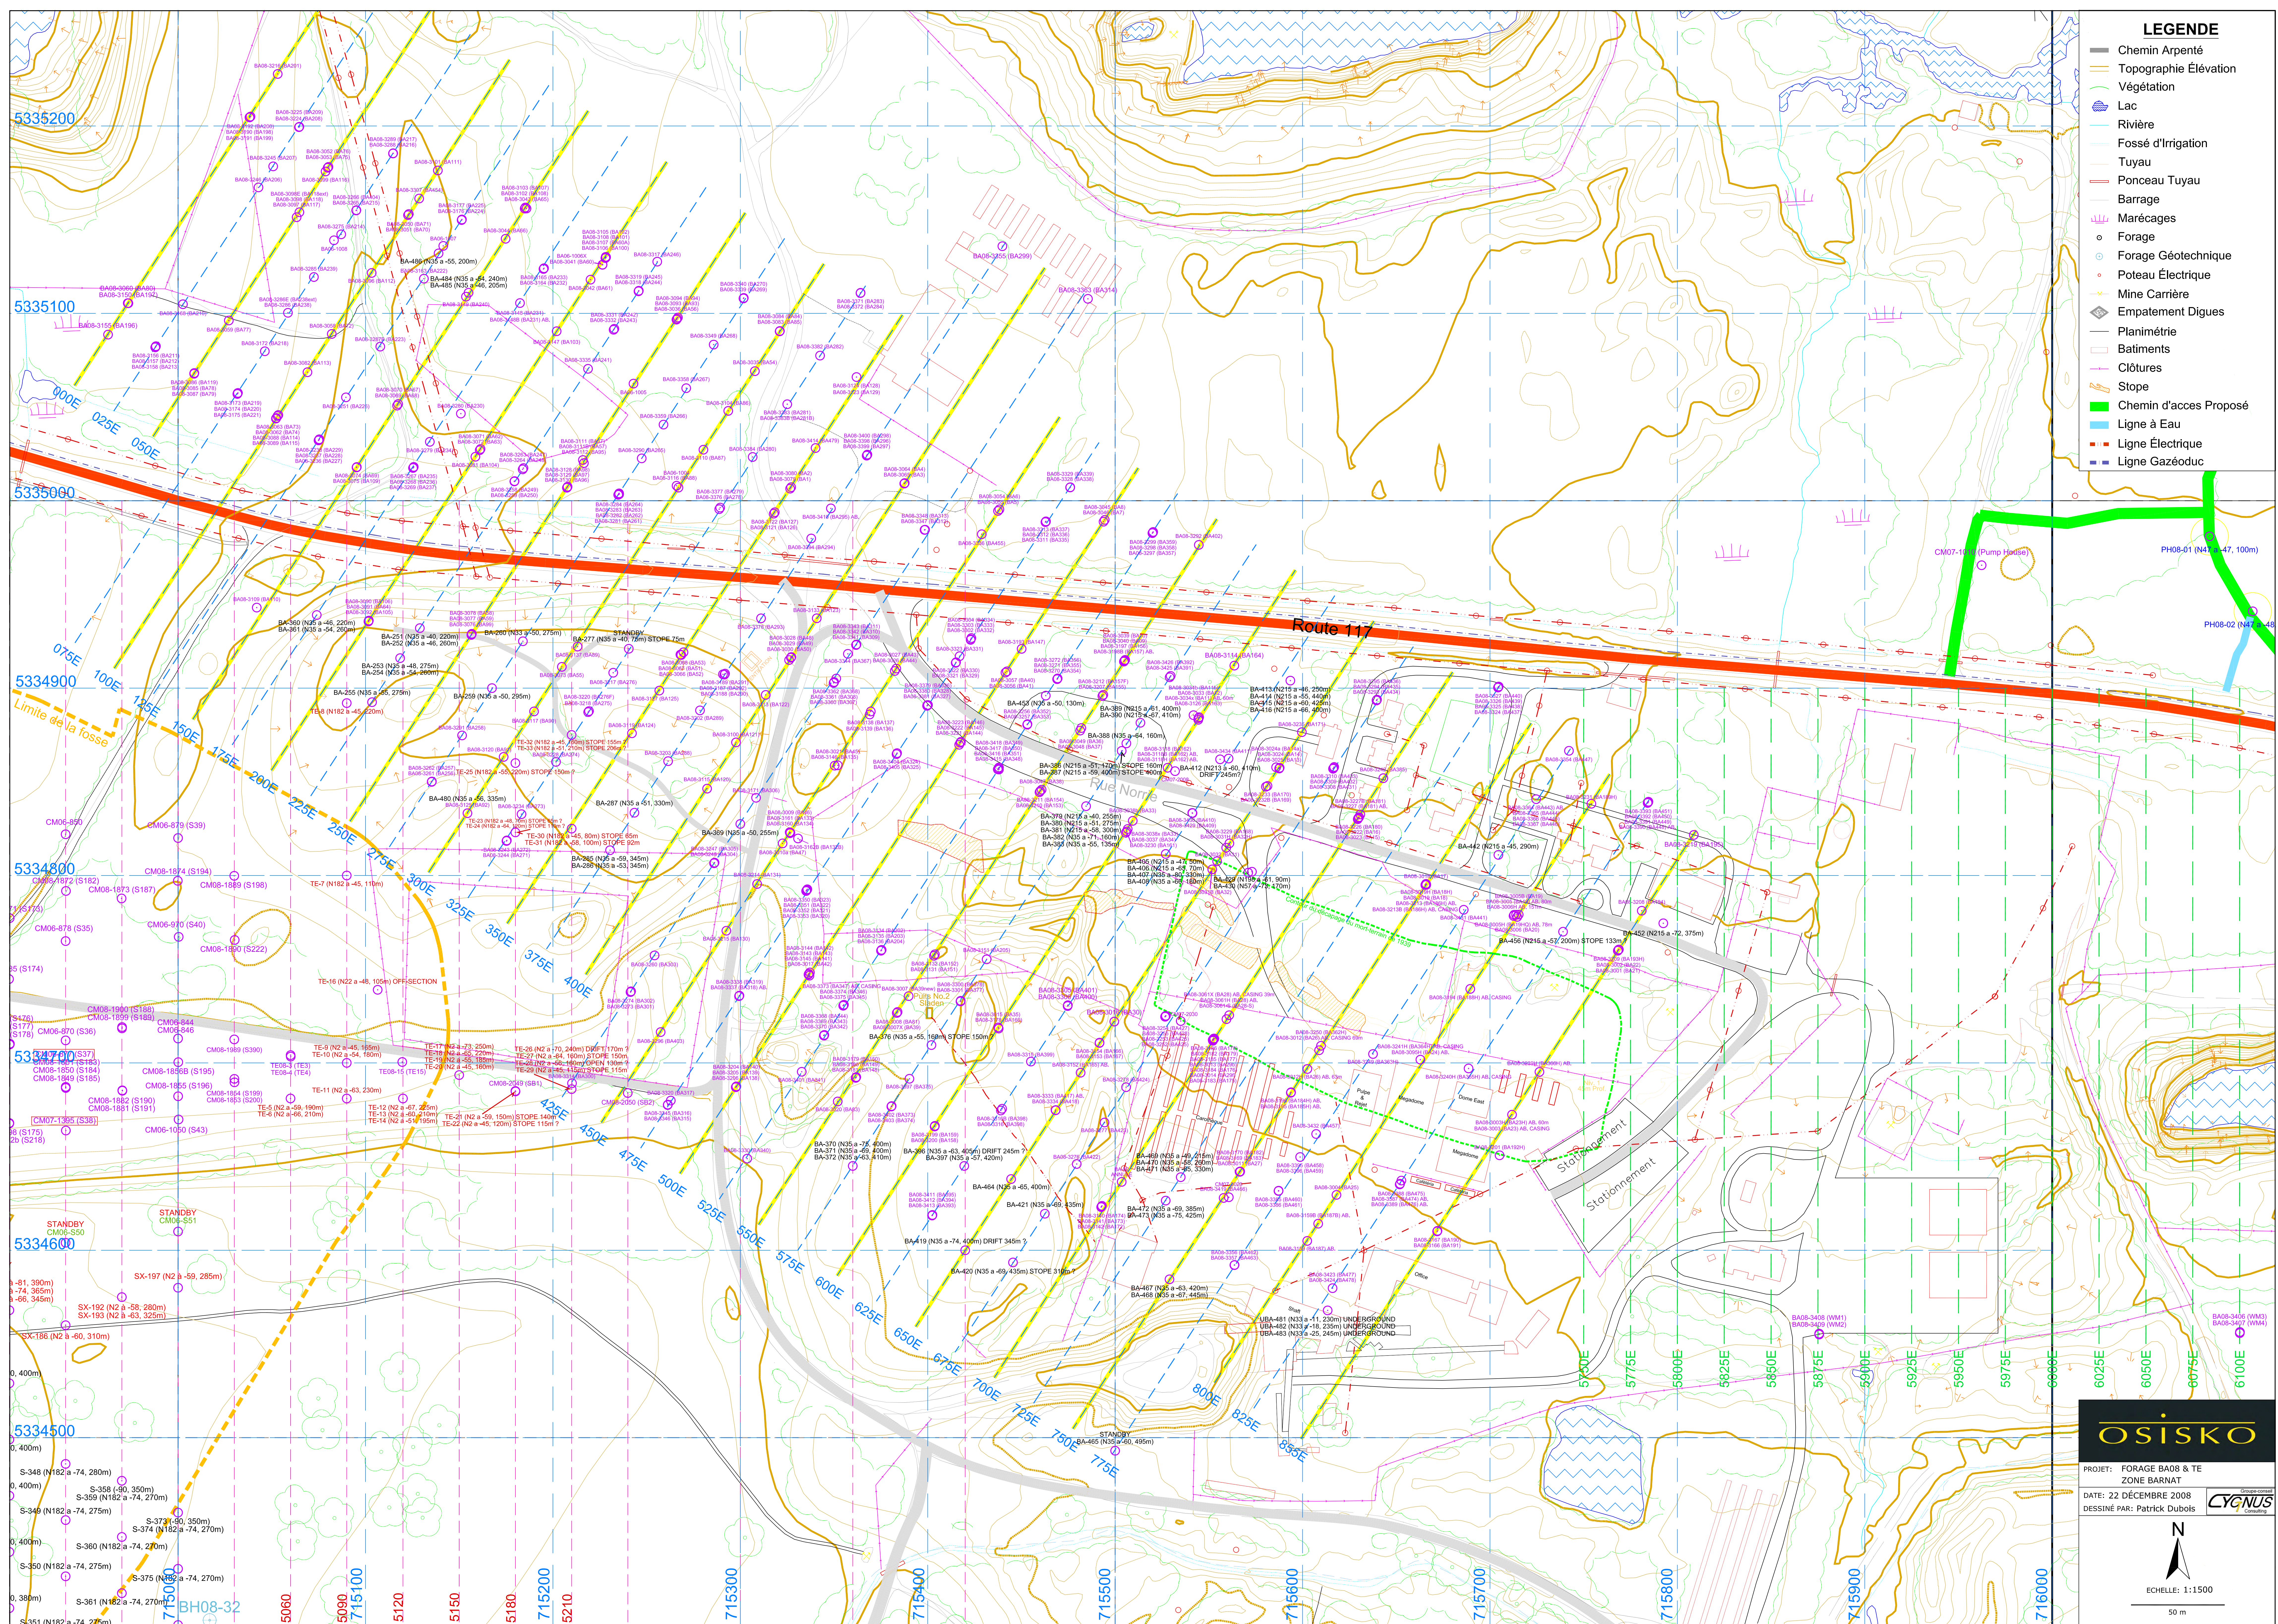

- 1.81M oz Au Inferred Resource @ 2.12 g/t Au using 1.00 g/t Au cut-off; Inferred Resource 2.03 M oz Au @ 1.74 g/t using 0.36 g/t cut-off
- Resource starts at surface and is contiguous to the Canadian Malartic pit; proximity to main Canadian Malartic deposit allows possibility for processing at planned Canadian Malartic mill
- Total Inferred Resource (Canadian Malartic plus South Barnat) increases from 0.720 M oz Au to 2.75 M oz Au; Measured and Indicated at Canadian Malartic Deposit currently at 7.7 M oz Au (including 6.28 M oz Au Reserves)
- At 2.12 g/t Au and \$900/oz gold, represents \$61.35 gross metal value per tonne; Feasibility Study at Canadian Malartic shows cost per tonne (all-in costs) at less than \$11.00 US/tonne

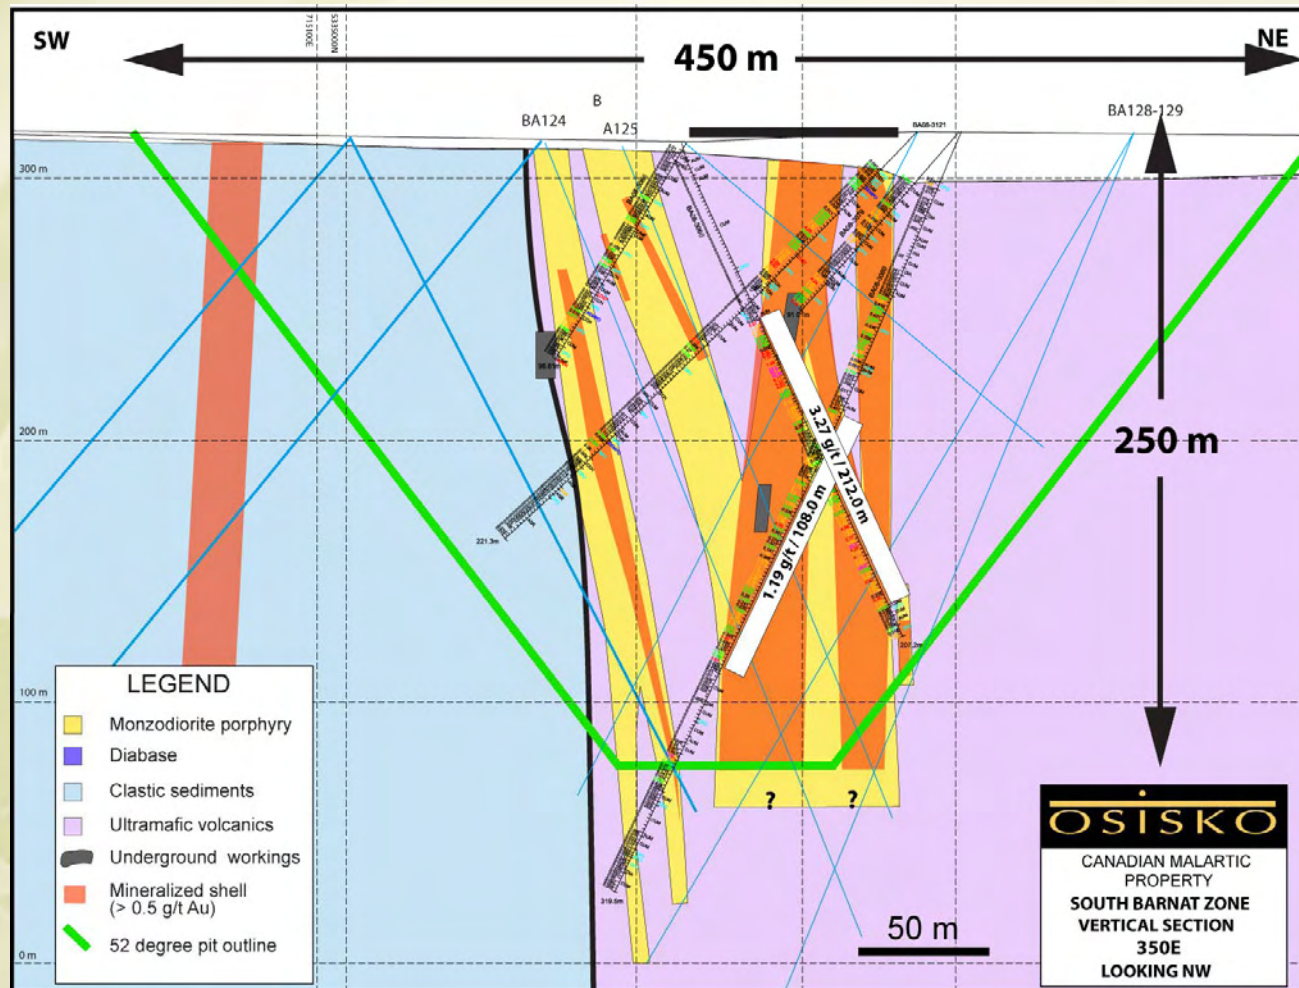

South Barnat

Phase 14: 115,000 m drill program over 850 m long grid, 25 m line spacing
